**Basic 950**

Hand operated, the Basic 950 footrest benefits from both height and tilt adjustment with a height range of 5-23 cm. The 'open' frame allows the footrest to be positioned close to a chair whilst avoiding interference with the starbase.

**Basic 951**

With a height adjustment of 24-36 cm, the Basic 951 is ideal for extra high workstations. The footrest benefits from a hand operated adjustable tilting platform and the compact design enables the Basic 951 to be used in space compromised areas

**Basic 950 Stainless Steel**

The Basic 950 stainless steel is hand operated and constructed with a stainless steel frame, for use in a hygienic environment. It is ideal for use in combination with a Score stainless steel chair.

## Footrests Special

Are you seated for long periods during your day-to-day activities? Tired legs or a cramped sensation? Unable to place your feet flat on the floor? An easy height adjustable footrest is just the solution for you! Suitable for any workplace, ranging from offices and industrial environments to supermarket checkouts and call centre workstations.

Score offers an extensive range of footrests.

- Our **Basic Line** stands for reliability and durability
- Our **Discus Line** combines functionality and design
- Our new **Score PRO 959<sup>®</sup>** footrest represents the new generation of footrests, boasting easy, quick, and safe foot-operated adjustment and a large footboard with new patented height adjustment

Score footrests guarantee years of carefree convenience

# Discus Line

## "Where feet meet design"

Modern design footrests fitted with foot-operated gas lift height adjustment, which is easy to operate from a seated position. Our footrests are manufactured from high-quality materials, such as a strong steel undercarriage and a tilting impact-proof plastic (ABS) footboard, guaranteeing many years of trouble-free use. The Discus has withstood a durability test of over 80,000 movements, which equals roughly 25 years of intensive use! In short, ergonomics, functionality, and design come together in the "Discus, where feet meet design".

### Discus 150T

- Height adjustment 5-15 cm (150T)
- Footboard tilt angle from 5° up to 27°
- Non-slip footboard
- Supports loads of up to 80 kg

# Score PRO 959<sup>®</sup>

## "Seating comfort on a pedestal"

Greater comfort and ease of use resulting in a sound and healthy sitting position. The new Score PRO 959<sup>®</sup> footrest possesses all the high-quality basic features you have come to expect from Score, and even surpasses expectations in a number of areas. Easier, faster, and safer to operate with just one foot, and fitted with a larger DIN 4556-compliant footboard.

- A highly user-friendly single foot-operated adjustment mechanism that requires only a slight tap of the orange button
- Easily adjustable to the right height for you, between 9 and 37 cm
- Optimum freedom of movement thanks to the footboard's tilt angle of up to 22° to get the position that is most comfortable for you
- Non-slip feet, suitable for every type of floor
- Large non-slip footboard, W 49 cm X D 40 cm, for optimum comfort (as per DIN 4556)
- Supports loads of up to 100 kg
- Quality that translates into a 5-year guarantee
- 99% recyclable thanks to Score's careful selection of materials

**DIN 4556**

**Working conditions legislation**

European Directive 90/270/EEC stipulates that a footrest must be made available if requested. This footrest should be at least 45 cm wide and 35 cm deep (DIN4556), and offer a height adjustment range of at least 11 cm, measured from the floor. The slope angle of the supporting surface must be adjustable from 5 to at least 15 degrees.

**Tip: The right height for your footrest!**

Your upper and lower legs should form an angle of 90°. If your feet rest comfortably on the footrest, the footrest is set to the right height for optimum blood circulation.
