

Phlebotomy chairs

- **Various armrests**, from fixed angle to fully adjustable.
- Phlebotomy chairs that **fit into small spaces**.
- Chairs with **Trendelenburg** position, for situations where blood must flow to the head quickly.
- Side chairs for the phlebotomy nurse.

Vena standard

The basic model from our phlebotomy chair series can be used practically anywhere given its compact design.

- Height adjustment 44 – 57 cm
- Trumpet glides
- Aluminium base ø 60 cm
- Including 1 armrest M PU fixed

Vena Vario

A comfortable phlebotomy chair which can be simply transformed in an instant into a "Trendelenburg" position when the patient feels unwell. At the same time as tilting the back, the leg rest rises up. Get up brackets are optional but make life easier for elderly patients. This phlebotomy chair can additionally be fitted with castors equipped with a brake. Optional are the adjustable armrests M PU.

- Protective glides
- Provided with legrest
- 4-Foot steel base, grey
- Fixed seat height: 46 cm
- Including 2 armrest M PU fixed

Vena Hydro

While the patient sits in the chair, it can be raised to the desired height with the hydraulic height adjustment system. Especially for elderly patients, this can make it easier to get in and out of the chair. This phlebotomy chair can additionally be fitted with wheels and a brake. Optional are the adjustable armrests M PU.

- Trumpet glides
- Aluminium base ø 70 cm
- Hydraulic height adjustment 45-62 cm
- Backrest can be tipped up to 30°
- Gaslift with rotation lock
- Including 2 armrests M PU fixed

Vena Hydro Nucleo

This is used in the nuclear medicine department, for example to make an echo of the thyroid gland. The Vario armrest allows the patient to rest his/her arm and relax while the radiopharmaceutical is injected into a blood vessel. During the scan (10 min.), the patient must keep his/her head perfectly still. The headrest has been designed so that the head fits in exactly and thus remains fixed. While the patient sits in the chair, it can be brought to the correct height with the hydraulic height adjustment system.

- Trumpet glides
- Aluminium base ø 70 cm
- Hydraulic height adjustment 45-62 cm
- Gaslift with rotation lock
- Including 1 armrest M PU adjustable

Anna Lankinen – ISLAB
& Oskar Ylänen – Ergotekniikka Tualitalo OY

“

Creating a Mini Phlebotomy Chair together

“Working with ScoreMedi helped us to find new ways of thinking”

The Finish laboratory enterprise, ISLAB, launched a project aimed to reduce the number of physical problems amongst biomedical laboratory scientists in 2012. The project included an awareness program and a quest for ergonomic solutions at the blood science lab. Physical complaints included pain in the lower back, neck, legs, wrists and fingers. ISLAB asked ScoreMedi's Finish partner, Ergotekniikka Tuolitalo OY, to help out on different ergonomic challenges.

Anne Lankinen, responsible for occupational health and ergonomics with ISLAB invited Oskar Ylänen of Ergotekniikka and export manager Tom Smit of ScoreMedi to examine the local situation and to give advice for improvement. They encountered very small spaces for blood sampling areas. A strong wish for a phlebotomy chair that could be operated by scientists in while sitting down as well as standing up was listed. Then there was a need for a phlebotomy armrest that could be adjusted by just one hand. Lankinen of ISLAB realized that the challenges were clear, however the solutions were not available. ISLAB asked Ergotekniikka and ScoreMedi to develop the perfect chair for them.

ScoreMedi, in close cooperation with Ergotekniikka, designed and produced a new, mini phlebotomy chair (MPC) with a small phlebotomy armrest (ETS). The ETS armrest supports the patient's upper-arm and elbow. The armrest is rotatable and easily, single handed, adjustable in height. The MPC chair including two ETS armrests, fits within a circle of 70cm. Because a patient sits higher in a MPC chair, it is easy to get in and out of the chair. The scientists have a choice to sit down or to stand up while sampling blood.

Anna Lankinen confirms that cooperating with Ergotekniikka and ScoreMedi was extremely smooth: “They listened to what we needed and wanted”. During the development stages the team of ISLAB was involved and prototypes were presented. Lankinen: “The involvement during development made our ideas concrete and helped us to find new ways of thinking.” The MPC chair with the ETS armrest was introduced during the fall of 2014 and within a year purchased by all major blood sampling institutes in Finland.”

Fixed phlebotomy armrests

- Basic armrest for phlebotomy chairs.
- PU is standard. Also available in various fabrics.

Adjustable phlebotomy armrests as standard or shortened

- Adjustable armrest for phlebotomy chairs.
- Fully rotatable and height adjustable for the comfort of patient and nurse.
- PU is standard. Also available in various fabrics.

MPC armrest

- Very compact phlebotomy armrest.
- Adjustable with one hand.
- Working at height. Even standing blood collection is possible.
- With comfortable, removable armrests.

360 support

- 360° rotatable armrest/backrest.
- Easy to move out of the way
- For supporting one or both arms.

Also for the ScoreMedi saddle chairs (Jumper & Amazone)

Armrest 6

- Developed for precision work (e.g. laboratory work or microsurgery).
- The round shape supports a firm fit around your body.
- Optional inverted mounting as shorter armrest 9.

Armrest 9

- Large armrest, also suitable for feeding babies.
- The round shape supports a firm fit around your body.
- Support for the entire forearm.
- Optionally, on some chairs the armrest can be folded over backwards (Swing Support).

Armrest 5 / Armrest 5 XL

- Adjustable width and height
- multi-deployment on various Score work chairs.
- Also available in ESD version.

Score At Work 4D armrest

- 4D adjustable: height, width, depth and rotation adjustable.
- Wide and narrow soft pads for resting of the arms.

Armrest 8

- 4D adjustable: height, width, depth and angle adjustable

Also for the ScoreMedi saddle chairs (Jumper & Amazone)

Get-up brackets

- Simple stand up after treatment
- Extra firm support
- Easy and safe to get in and out of the chair
