

# The anti couch potato for kids.

For kids, it's normal to be constantly moving. What to parents can seem like fidgeting and a refusal to sit still is, for a child, entirely natural. With this in mind, the Aeris Swoppster has been specially designed for kindergarten and primary school children.

The multi-directional design ensures that children can follow their urge to move freely even when seated, thus encouraging posture change. As a result, children remain more alert and focused. Unless, of course, their little brother is making the same joke he's made three days in a row...

## Now even sitting is fun.

Children's curiosity knows no bounds. So isn't it better if the chair moves when the child moves? On the Aeris Swoppster, the child can spontaneously follow any impulse as and when it arises, without restriction of freedom of movement. Wee ones can straighten up with a free diaphragm ready to burst out laughing any minute.

## Children can do whatever they want – even walk while sitting.

With its flexible design, the AERIS Swoppster promotes spinal mobility. The up and down movement of the chair is similar to the natural movement when walking or running. This strengthens the back and muscles.

Available in a range of contemporary and cheerful colours.

## Swopping makes you smarter.

Movement promotes neuronal networking in the brain and thus mental development. Sitting on the AERIS Swoppster, the brain is optimally supplied with blood and oxygen, so kids can concentrate much better on learning. What was that again?  $2 \times 3$  equals 4...?

## Grows without putting down roots.

The AERIS Swoppster is height-adjustable and can grow with the child.

Each chair is handmade in Germany with great care and precision. Visit us at [aeris.de](http://aeris.de) and give your child a healthy foundation.

It was about time to reinvent the way we work and live.  
So that's just what we did.

The issue: We sit too much and don't move enough.  
This is detrimental to our health. The lack of activity  
robs us of our concentration, energy and creativity,  
even after a short amount of time.

The solution: Aeris is driven by the goal of keeping  
our bodies in constant movement. Our products and  
concepts contribute to an active and healthy lifestyle.  
They enable movement in precisely the areas where  
it's least expected, but where it's needed the most  
– when sitting.

We are your secret ingredient for a more active,  
healthier and subsequently happier life.
